The best seat in the house

It's a shame, really. Something so beautifully designed that you'll hardly ever need to look at it. The cockpit of the new Lancer EX has been ergonomically laid out to put every control exactly where intuition tells you it should be. Paddle shifters and audio controls have also been added to the steering wheel, giving you the control you want without ever needing to take your eyes off the road ahead.

STANDARD AND OPTIONAL EQUIPMENT

Color-keyed side protector moldings

Front and rear mudguards

Rear spoiler

Leather-wrapped gearshift knob

Cruise control

Large color liquid crystal multi-information display

Aluminum pedals

Keyless operation system

USB port

LED Brake lights

Note: Some of the equipment may vary in appearance or availability according to market. Please consult your local Mitsubishi dealer/distributor for more detailed information.

Magnesium paddle shifters

215/45R18 tires with 18-inch light alloy wheels

205/60R16 tires with 16-inch machined bright light alloy wheels

Driver's and front passenger's front SRS airbags

Front grill with upper chrome/lower chrome

LED daytime running lamp/front fog lamp

2.0-liter GT Package / Black seats
Equipment may vary according to market.

Black mesh print panels (instrument panel and front door trims)

The inside story

After the racing-inspired passion of Lancer EX's exterior design, what awaits you on the inside may come as a surprise. Serene and inviting, Lancer EX provides an environment free from the distractions of the outside world. Insulated doors keep out unwanted noise, while the automatic climate control and spacious seating make Lancer EX a pleasure to drive before you've even started on your way.

Performance

However you choose to drive, the pure excitement of the rally courses that gave birth to Lancer EX is unmistakable. It's in the hum of power rising from beneath the hood, and the exquisite smoothness of the CVT as it shifts up and down. Once Lancer EX has spoken to you, you'll understand.

Black geometric pattern fabric seats with black mesh print panels

Engine and transmission

2.0-liter MIVEC Engine

Absolute thrill in a 4-cylinder package. Lancer EX's 2.0-liter powerhouse uses a lightweight aluminum block for optimum performance as it puts out 110 kW (150 PS) to take control of city streets and open highways alike. MIVEC technology provides optimal valve timing at both low and high rev ranges, to give you the most of every curve and straightaway out there.

1.6-liter MIVEC Engine

The 1.6-liter engine is a concentrated rush of excitement, laying down enough power for sporty performance wherever there's pavement to be found. Like its bigger cousin, this engine also features an aluminum block for better efficiency and MIVEC technology for more aggressive starts and maximum high-range output.

Sports Mode with Magnesium Paddle Shifters

Available on CVT models, Sports Mode lets you enjoy the racing feel of changing gears with a 6-step shift control that still provides the convenience of an automatic transmission. For even greater control, paddle shifters built directly into the steering wheel make shifting as easy as a single press of your finger.

CVT with INVECS-III

With CVT (Continuously Variable Transmission), Lancer EX offers a new level of driving enjoyment: an automatic transmission that's quiet, efficient, and eliminates the harshness and power lag of traditional gear changes.

MIVEC Technology

MIVEC (Mitsubishi Innovative Valve timing Electronic Control) is an exclusive technology that adjusts intake timing for optimal performance across the rev range. At low ranges, MIVEC provides on-demand acceleration for quicker starts, while higher ranges receive an impressive boost of power.

Balance and control

Power without stability will get you nowhere fast. Lancer has long been known for pushing the envelope in providing drivers with unparalleled driving control, so as exceptional as the Lancer EX is, its advanced handling and stability should come as no surprise. Incorporating the lessons of the racetrack and the rally course, Lancer EX fuses quick-responding suspension with flex-resisting body construction for high performance driving that's sure and confident.

End-to-end Design Stability

Every piece of Lancer EX's body and frame has been designed with greater stability in mind. With a longer wheelbase and wider tracks than previous models, the new Lancer EX's larger footprint means greater stability, especially when cornering.

4-Wheel Independent Suspension

Incorporating front MacPherson struts and a rear multi-link system, Lancer EX makes sure work of unpredictable conditions. Responding exactly as needed, the independent suspension keeps all four wheels firmly on the ground for performance that's as reliable as it is comfortable.

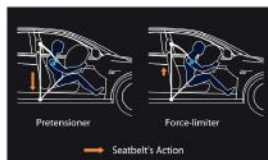

Safety and reliability

The unexpected. You can't predict it, but you can be prepared for it. Because surprises can come in any form, Lancer EX includes an array of active and passive safety features to protect all occupants from harm. Powerful anti-lock brakes and brake-force distribution enable drivers to avoid hazards in the road, while the RISE body works to absorb collision damage and direct it away from the interior.

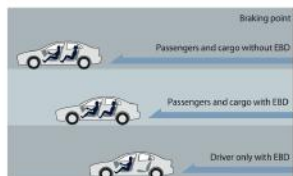

SRS Airbag System

SRS Airbag Driver's and front passenger's airbag system. In the event of a collision, front SRS airbags activate to help protect you and the front passenger by absorbing the force of impact.

Seatbelts with Pretensioners and Force-limiters

The driver's and front passenger's seatbelts are available with pretensioners that reel in to secure the occupant in the initial moments of the collision, and force-limiters that gently release the occupant to reduce the risk of injury.

ABS with EBD

When a sudden surprise is dropped in your path, Lancer EX's ABS (Anti-lock Braking System) gives you the ability to maneuver safely around obstacles as you slow down. The EBD (Electronic Brake-force Distribution) assists by applying additional force to the rear brakes as needed, enabling quicker stops even when carrying passengers.

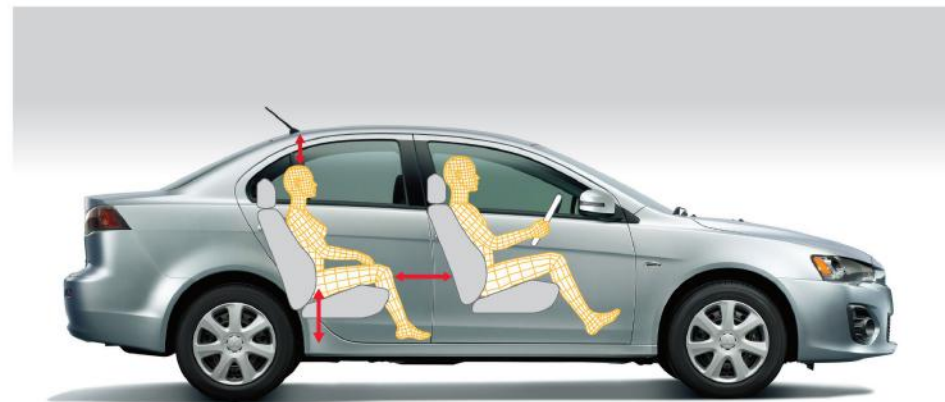

RISE Body

Lancer EX's safety-consciousness starts at the very beginning, with the construction of the RISE (Reinforced Impact Safety Evolution) body. This design protects occupants by employing extensive front and rear crumple zones to absorb impact energy before it can be transferred to the cabin. The cabin and doors, meanwhile, have been constructed with a highly rigid frame and reinforced beams to redirect energy and damage around and away from the occupants.

Comfort and utility

Performance never fails to impress, but don't forget you're still human. A comfortable interior appointed with amenities throughout take an exciting ride and make it even more enjoyable for everyone on board. Lancer EX also provides you with a spacious and convenient cargo area and other practical features. You have a life, after all.

Comfortable Seating

Lancer EX's larger body allows for a roomier interior, especially for rear passengers, who will enjoy the increased leg and headroom, and the higher hip point. This gives everyone more room to stretch out and enjoy the ride. Front occupants are also sure to appreciate the sport seats with lumbar support, available on GT models.

Cargo Space

The new Lancer EX features a large and convenient trunk space, providing up to 400* liters of storage capacity. The lid has been redesigned with hinges to the sides to provide more efficient use of space and avoid hitting your cargo. For added convenience, stored items may be accessed from the interior via the 60:40 split folding rear seatbacks.

*With the optional trunk floor box, the total trunk space is 315 liters.

Fully Automatic Air Conditioner

For the comfort of you and your passengers, Lancer EX features a fully automatic climate control system for front and rear seats.
